## ZYMINE PEPIONIZING POWDERS. (FAIRCHTLD.)

ONE of these added to a pint of cow's milk so pre-digests it that it will no longer form a curd to irritate the infant's or invalid's stomach. These powders are a great advance, "the introduction of which has probably done more than any other therapontic measure of re-cent times to lessen infact mortality." The British Medical Journal says, "In Diarrhoos and Dysentery there is no food so safe as milk orenared with these powders." Zymine Peptonizing Powders are supplied by all Chemists.

HONGKONG, JANUARY 22ND, 1891,

THE compliment which our neighbours of Tonkin have paid M. Jules FERRY in elect. ing him as their delegate to the Upper Colonial Council was well deserved. He has all along been the champion of French an-Rules of H.B.M. Supreme and other Courts nexation, from the time when it cost him office till the present, when his faith in the future of Tonkin seems about to be justified before the world. As he says in his letter to his constituents just published, evacuation is so longer spoken of in the French Parliament, even by the leaders of the Opposition. Yet it is not so long since evacuation was very seriously contemplated. Even after the sacrifices involved in the "intelligent destruction" at Pagoda and the abortive descent on Tamsui and Kelung, a policy of scuttle, such as commended itself to our own too tender conscience pricked by the repulse at Majuba, was loudly advocated. When that danger was tided over the new colonists had to face a feeling at home that was not far removed from disgust. A subvention of thirty million france, and nothing to show for it! So much blood and treasure wasted, and all gained was partial command of swampy delta and a merely nominal control of uplands swarming with pirates, or patriots, -according as your standpoint is 9th January. The Bangkok Times says it broke French or Chinese. The delta, it was ad- out in San Chow-mai, a part of the thickly RIVER Ports | and Kelly & Walsh, Shanghai mitted, could be kept clear of decoits, but originated in a Chinese pig-killing establishment. the hill districts were quite another affair. Let us, then, said one party, withdraw from any attempt to "pacify." the 400 dwelling houses. The damage is roughly hills, and confine ourselves to the lowlands. To this it was replied that the immediate result would be complete anarchy in the highlands, and this would constrain China very much if it would; China would only too mony. China would intrigue at great advantage for a solid block of cenerate 90 feet thick. The caisson is sunk into the juterior, barren inhospitable island has become the civil by the members of the Jubilee Committee and D'Aguilar, and I have now to algrify to you rest of the country down to the seaboard

of pirates, be found navigable by steamers? V.C. Well, as M. FERRY triumphantly says indeed, is jubilant on the subject of the districts of Asia and America." There can industry, always provided that it be not too

much shackled by Government interference.

What Tonkin requires, and has required

ever since it became a French Colony, is to be let alone. An enlightened policy of free trade, a cordial invitation to foreigners (by which we mean Europeans other than Frenchmen) and to foreign capital, would have advanced Tonkin already to far beyond even her present favourable position. It is idle, of course, to deny that in England with automatic Steam Machinery of the where we alone are free-traders and all the that our operatives require to be protected in their turn against the state-aided manufacturers of the Continent. But it would seem that the condition-of things in Toukin differs very considerably from those either in an old country like England or a new one like Victoria. In Toukin it is not European labour that whenever practicable, are despatched by first can hope to find employment, but European capital, and of European capital French perhaps is the shyest in seeking outlets abroad. and the full amount allowed for Packages and French investors (the Suez and Panama Canals notwithstanding) prefer to invest their savings in France; this is even the case, we believe; with French residents in the Far East, Hence if Tonkiu is to get the capital necessary to give her a fair industrial start she will get it more readily from England or Germany than from France, and most readily, we need hardly say, from her neighbour and sympathiser, Hongkong. Sympathiser, because she calls for our sympathy. She has suffered too much from red tape. She has been made a hunting ground for youthful placemen only anxious to use her as a stepping-stone to some post nearer the boulevards. And she has not hesitated to boldly affirm her preference for our fiscal freedom and comparative independence. Indeed, nothing is more remarkable throughout the discussion as to what is to be done with Tonkin than the friendship-we might almost say admiration—which the French merchants of Hanoi and Haiphong have displayed for Hongkong

What is to be done with Tonkin is a question which, as M. FERRY's letter informs his constituents, will soon come before the mother country. The Government, he says has been requested to lay before the House there were present :- H.E. the Governor (Bir bill for the general re-organization of William des Voers), H. H. Major General Digby Indo-China. This measure, he justly remarks Dis of the greatest interest to the General Hon. S. Brown, Surveyor General Hon. of the people Colony, and he promises for his own part that he " will endeavour to introduce into it took a prominent place in the recent debate." What he wishes to imply by this is explained more clearly in the closing sentence of his \_[208 ] letter, as reported by the Times: "There can be no successful colonization without a large share of autonomy." The reference, no doubt. son of the Rev. JAHER PALMER, The Elms, Clapton, is to the scheme which was suggested some time since and favourably received in many quarters: the union into one Indo-Chinese Empire of the four dependencies of Cochin-China, Annam, Tonkin, and Cambodia. The dream of a French Empire in Asia is as old as Dupleix, and it is not to be wondered at China. But it is doubtful whether our taste for a closer union with the southern feasibility or real advantage to themselves their doubts, until these were solved, one way or another, by the course of events. And the course of events will, if we mistake not, eventually constitute Hanoi the capital

and its institutions:

THE HONGKONG JUBILEE.

The opening day of the Colony's Jubilee com worthy in every way of the anniversary. The programme for yesterday consisted of the meeting of the Councils to send a congratulatory address, the service in St. John's Cathedral. and the public ball in the City Hall, and each of these functions was largely attended and the proceedings followed with the greatest interest. The committee who have been entrusted with the carrying out of the com prehensive programme which celebrates the anniversary have apparently thrown their whole heart into the work, and judging by the first day's functions, the celebration should be. carried out in the same spirit in its entirety and with the same good fortune, a success, as we have said, in every way worthy of the important event which the proceedings are inaugurated to honour. The Committee consists of the following gontlomen:—Sir James Russell, C.M.G. (Chairman). Hon. S. Brown, Hon. W. M. Deane, C.M.G., Hon. Ho Kal. Hon. J. J. Keswick. Hon; N. G. Mitchell-Innes, Hon. P. Up to this time the progress of the Colony were entertained as to its future, expectations which have since been amply fulfilled; but for little headway was made. In addition however, to these natural and necessary disadvantages, it appears to have laboured under others, created by a system of monopolies and farms, and petty regulations: peculiarly unsuited to its position, and proudicial to its progress. These seem to have arisen partly from an attempt to struggle with the difficulties in the way of establishing order and security in the midst of the -vagabond and piratical population which forgoont its waters and infect its coasts, and partly from desire to raise a revenue in the island in some degree adequate to the mainten-ance of its Civil Government. While this despatch was on its way out another dreadful outrage occurred. Six young men belonging to various houses in the Canton factories, having landed at a village about four miles up the rivor, wore captured by the natives, murdered, and their bodies treated with indignity. The Canton Authorities, while the young men were known to be in dauger but to be still alive had remained indifferent to the representations made to them by the Consul, and allowed the tragedy to be enacted without any effort on Davis directed a naval demonstration at the Bogue, and a company of the 95th Regiment was ordered to Canton to witness the execution of four men represented by the Chinese were generally supposed to have known nothing

Then came the Arrow war of sold and used as a sugar refinery; it is now the 1857-60, which, to quote from Mr. W. During Sir Heronles Robinson' "gave the greatest impetus to the growth of government a commencement was also made Hongkovg by transferring to the colony in a with the laying out of the Public Gardens great measure the trade of Canton, and practically and Robinson Road was formed. Never was such a day of excitement in the colony, and had Alum been caught at once he would have been lyuched bayond, a doubt, but he had gone off with all his family by the early steamer to Macso. Being pursued thither and brought back he was subsequently brought to trial and acquitted, the guilt of the dead being thrown by him on his foreman and another man, who had made their oscape. He was subsequently kept in gaol at large for some time, and there I made his acquaintance. He was a tall imposing-looking man for a Chinese and had been well educated. The respect and deference shown to him by all the prisoners were wonderful. On the Sundays, when I went to conduct a religious service with them, he quite took me under his patronage, had the books ready, and maintained perfect order among all who attended." The reason the poison did not prove fatal to those who took it was that it had been mixed with the bread in such quantity as to act as an emetic. Subsequently a civil action was brought against Alum by Mr. Tarrant for selling unwholesome bread. The Attorney-General, who appeared for the plaintiff; abandoning all suggestion of guilty knowledge on the part of the defendant, rested his case upon the common-law obligation cast upon a baker to sell only bread fit for the food of man. The presence of arsenic was fully proved, and the jury returned a verdict for \$1,010. A point of law was reserved, but was decided in Mr.

After Sir John Bowring's, departure the Covernment was administered for a few months by Liout-Colonel W. Caine, Liout-Governorthe same officer who was appointed Chie Magistrate in 1841; he was a prominent figure in the colony during the whole period of his residence, and was a party to some notable libel trials in connection with attacks upon his reputation. On the 27th July, 1882, a typhoon swept over Hongkong, Masao, Whampon, and Canton, being felt most severely at Whampon. The less of

life was estimated at 40,000, but only a comparatively small proportion of this occurred at Hongkong. In the harbour not much damage was done, but on shore all the matsheds were blown down and several Chinese houses, a number of persons being killed in the latter. Amongst the events of this period must also be recorded a great rainstorm which occurred on the 7th June, 1864, which flooded a number of houses, demolished several, and caused some loss of life. Another event, happily of a different character, which occurred during the same year was the introduction of gas.

The following remarks by Dr. Legge on orime in the colony may here be introduced :-"I would distinguish two eras, that of violent burglary and that of piracy.
